CV122 (CV30) Electrical Insulating & Aerospace Wood Varnish

TECHNICAL DATA SHEET

Product Description

CV122 (CV30) is a single pack, electrical insulating gloss varnish designed for application as an electrical insulating coating. CV122 (CV30) can also be used as a wood varnish for aerospace purposes.

- Air drying
- Water resistant
- Fungal resistant
- Used on coil, armature windings, electrical & radio apparatus

Components

Mix Ratio (by volume)

- CV122 (Base) 1 part
- T1 (Thinner) to viscosity

Specifications

CV122 is qualified to:

- BS5X17
- Def Stan 80-129 Type 2

*Note: PPG Aerospace recommends you check the most recent specification QPLs for updated information.*

Surface Preparation and Pretreatment

Ensure surface in clean, dry and intact using a high performance solvent cleaner. DeSoto® CN20 or Desoclean™ 45 solvent cleaner are recommended.

Instructions for Use

Thoroughly stir before use.

Viscosity: (23 °C/73 °F)

Not applicable - Supplied ready for use for brush application. Thin as required for spray application.
CV122 (CV30) Electrical Insulating & Aerospace Wood Varnish

Pot Life:
Not applicable

Application Guidelines

Recommended Application Conditions:
Temperature 15 - 30 °C (59 - 86 °F)
Relative Humidity 30 - 80%

Application:
Apply 1-2 coats to achieve the recommended dry film thickness. Allow a minimum of 12 hours between coats.

Theoretical Coverage: (unthinned)
14 m²/Lt @ 30 µm dry film thickness
560 ft²/US gal @ 1.2 mil dry film thickness

Recommended Dry Film Thickness:
20 - 35 µm
0.8 - 1.4 (mil)

Dry Film Density:
1.1 g/cm³
9.1 lbs/US gal

Dry Film Weight:
33 g/m² @ 30 µm dry film thickness
0.006 lbs/ft² @ 1.2 mil dry film thickness

Note: These application guidelines represent PPG’s best advice for usage in standard conditions. Some parameters will be influenced by environmental conditions, equipment settings, and other variables.

</tr>
</thead>
<tbody>
<tr>
<td>Conventional Air Spray</td>
<td>1.0-1.8 mm</td>
<td>29 to 44 psi (2 to 3 bar)</td>
</tr>
</tbody>
</table>

CV122 can be applied by conventional spray or brush. Thin as required with T1 thinner.

**Equipment Cleaning:**

Clean spray equipment before use and as soon as possible after use. T1 solvent thinner is recommended.

**Physical Properties**

**Colour:**

Colourless

**Gloss:**

Full Gloss > 85 units with a 60° meter

**DRYING TIMES @ 23°C (73°F) 50% RH**

<table>
<thead>
<tr>
<th>Surface Dry</th>
<th>4 hours</th>

CV122 (CV30) Electrical Insulating & Aerospace Wood Varnish

Flash Point:
CV122 Base Component 38°C (100°F)
T1 Thinner 38°C (100°F)

Shelf Life:
CV122 Base Component 24 months in original unopened container
T1 Thinner 24 months in original unopened container

Note: Shelf life may vary due to OEM specification requirements. Refer to container label for specific shelf life information.

Note: The application and performance property values are typical for the material, but not intended for use in specifications or for acceptance inspection criteria because of variations in testing methods, conditions and configurations.

Storage Recommendations

Inspect the condition of the container to ensure compliance. The material should be stored at temperatures between 5°C to 35°C (41°F to 95°F) to ensure shelf life.

Note: When procuring to a qualified material specification, follow those storage instructions.

Health Precautions

This product is safe to use and apply when recommended precautions are followed. Before using this product, read and understand the Safety Data Sheet (SDS), which provides information on health, physical and environmental hazards, handling precautions and first aid recommendations. An SDS is available on request. Avoid overexposure. Obtain medical care in case of extreme overexposure.

For industrial use only. Keep away from children.
