Super Koropon® 515-700 Fluid Resistant Interior Primer

TECHNICAL DATA SHEET

Product Description

Super Koropon® 515-700 fluid resistant conventional solids epoxy coating. This high performance primer is used to protect the structural interior of aircraft from corrosion.

- Compatible with epoxy and urethane interior topcoats
- Excellent adhesion to a variety of aluminum and composite surfaces
- Excellent Skydrol® resistance
- Compatible with all non-electrostatic spray equipment
- Can be applied in a wide range of conditions
- Service temperature -54°C to 177°C (-65°F to 350°F)

Components

Mix ratio (by volume):
- 515-700 (base component) 1 part
- 910-704 (activator component) 1 part

Specifications

515-700 primer is qualified to:
- 171A4764P1
- 507-9-466
- CM37.14-02-01
- CM37.14-05
- CMS-CT-202 Type I Class 1
- DMS 1786 Type I Composition A
- DPM 4838
- HBMS-24-008
- MCS 9261
- MMS-415
- MS 37.14
- P8266829
- SP-676
- STM0685
- STM0954-01
- SVHS 6600
- VS 1-3-1-41

Note: PPG Aerospace recommends you check the most recent specification QPLs for updated information.

Product Compatibility:

515-700 primer is compatible with the following topcoat specifications:
- BMS 10-11 Type II
- BMS 10-60 Type I
- DMS 2143
- DPM 5391
Super Koropon® 515-700 Fluid Resistant Interior Primer

Surface Preparation and Pretreatments

Super Koropon® 515-700 primer can be applied over clean properly prepared aluminum and composite surfaces. Aluminum surfaces shall be treated with materials conforming to MIL-C-5541 or equivalent.

Instructions for Use

Mixing Instructions:
Prior to mixing, thoroughly shake the base component. Add the activator to the base component and stir well, maintain constant agitation for 10 minutes to ensure proper mixing.

Note: It is important to condition the paint for 24 hours prior to mixing by placing all materials in the shop or hangar, with ambient temperatures between 13° and 35°C (55° to 95°F). The minimum temperature of the paint components should be 13°C (55°F) prior to mixing.

Induction Time:
Not Required

Viscosity: (23°C/73°F)
- #1 Signature Zahn cup: 26 to 35 seconds
- #2 Signature Zahn cup: 10 to 16 seconds
- #4 Ford cup: 10 to 12 seconds
- ISO 3mm cup: 25 to 37 seconds
- ISO 4mm cup: 15 to 18 seconds
- BSB3 cup: 22 to 26 seconds
- BSB4 cup: 12 to 15 seconds
- AFNOR #2.5 cup: 37 to 45 seconds
- AFNOR #4 cup: 13 to 15 seconds

Note: Viscosities quoted are the typical ranges obtained when using specified mix ratio.

Pot Life:
8 hours @ 21 - 25°C (70 - 77°F)
Super Koropon® 515-700 Fluid Resistant Interior Primer

**Application Guidelines**

**Recommended Application Conditions:**

- **Temperature**: 15 - 30°C (59 - 86°F)
- **Relative Humidity**: 20 - 90%

**Application:**

Ground the aircraft and the application equipment before priming. Stir the primer slowly during the application. The suggested film thickness is 12.5 to 22.5 microns (0.5 to 0.9 mils). This can be accomplished with one medium coat with a 50% overlap.

*These application guidelines represent PPG’s best advice in standard conditions. Some parameters will be influenced by environmental conditions, equipment settings, and other variables.*

**Theoretical Coverage:**

8.6 square meters/liter at 25 microns dry film (352 square feet/gallon at 1 mil dry film)

Recommended dry film thickness; 12.5 to 22.5 microns (0.5 to 0.9 mils)

**Dry Film Density:**

1.88 grams/cubic centimeter (15.66 pounds/gallon)

**Dry Film Weight:**

47 grams/square meter at 25 microns dry film (0.00956 pounds/square feet at 1 mil dry film)

**Equipment:**

515-700 primer is compatible with all non-electrostatic spray equipment.

515-700
Super Koropon® 515-700 Fluid Resistant Interior Primer

Shelf Life:
12 months from date of manufacture to most OEM material specifications. Consult the specification to verify shelf life requirements.
24 months from date of manufacture for PRC-DeSoto Standard.
Note: The coating shelf life is provided for original, unopened containers.

Note: The application and performance property values above are typical for the material, but not intended for use in specifications or for acceptance inspection criteria because of variations in testing methods, conditions and configurations.

Storage Recommendations
Inspect the condition of the container to ensure compliance. The material should be stored at temperatures between 5°C to 35°C (41°F to 95°F) to ensure shelf life.

Note: When procuring to a qualified material specification, follow those storage instructions.
Health Precautions

This product is safe to use and apply when recommended precautions are followed. Before using this product, read and understand the Safety Data Sheet (SDS), which provides information on health, physical and environmental hazards, handling precautions and first aid recommendations. An SDS is available on request. Avoid overexposure. Obtain medical care in case of extreme overexposure.

For industrial use only. Keep away from children.
