Surface Preparation and Pretreatments

Desoclean™ 130 cleaner is a strong solvent that is used to clean metallic and non-metallic substrates and spray equipment.

Induction Time:
Not Required

Application Guidelines

Application:
Saturate a clean white cotton or nylon cloth with Desoclean™ 130 cleaner, and wet the surface to be cleaned. Immediately wipe dry the wet area with a clean white cotton cloth, using a "wipe on, wipe off" procedure. Do not let Desoclean™ 130 cleaner dry on the substrate's surface before wiping it off. Be sure to change your wipe and dry rags often. Do not put soiled or previously saturated rags into solvent containers. Do not use rayon, acetate, or other synthetic fibers that will be dissolved by Desoclean™ 130 cleaner. Desoclean™ 130 cleaner can dissolve, craze, or soften some plastic and painted surfaces.

Shelf Life:
12 months from date of manufacture to most OEM material specifications. Consult the specification to verify shelf life requirements.
24 months from date of manufacture for PRC-DeSoto Standard.

Note: Shelf life is provided for the original, unopened containers.

Note: The application and performance property values above are typical for the material, but not intended for use in specifications or for acceptance inspection criteria because of variations in testing methods, conditions and configurations.

Storage Recommendations

Inspect the condition of the container to ensure compliance. The material should be stored at temperatures between 5°C to 35°C (41°F to 95°F) to ensure shelf life.
